MY SCHOOL ENTERPRISE

social entrepreneurship projects – competition organised by Liceul Teoretic "Ovidius"

MOTIVATION

The FIFA23 tournament part of ESPORTS (Electronic Sports) category, is a new concept, but already recognized and legislated all over the world, recently and in Romania, too. Young people nowadays tend to spend many hours in front of devices, so we have chosen to integrate and connect the passions of young people to the daily life of a high school student, in a pleasant, competitive atmosphere, with the supporters next to them, face to face as in any sport, to bring the virtual into real, to socialize and create friendships.

CONCEPT PRESENTATION

The project was designed to interact, to get out of the virtual world while using it. Also, this club was thought of as an opportunity for young people to develop professional skills in terms of teamwork, perseverance, communication and empathy. We hope our innovative initiative helps us spend quality and memorable time with our colleagues, relax the atmosphere at school, get to know each other and form real friendships, united by the same passion.

ACTIVITIES – promotion

The project was promoted among students in the 9th and 10th grades through oral presentations in every class and with the help of a poster containing a QR code generated in order to facilitate access to the competition registration form. Most of our colleagues heard about the club and the tournaments directly from us during the presentations in their classes.

CALENDAR OF EVENTS / ACTIVITIES

We have carefully analyzed the project activities. The weekly meetings, on Wednesdays, were set so as not to affect the classes, that is, between 12.30-13.20. After the registrations using the QR code had been completed, we started on December 13, 2022 with 22 members of the club and participants in the tournaments. They took note of the rules of the competition of the tournament and the teams were drawn by lot. Two tournaments that are underway: Club teams and National teams. In the competitions rules, emphasis was placed on fair play (no bullying, insults, vulgar language), but also on the careful use of the equipment provided by the school and the initiators of the project, taking into account the civilized behavior of the fans who came to support their favorites. It was also foreseen the situation in which a player could not participate, being given a score of no show. The start date was December 13, 2022. The project takes place in person, in high school, usually every Wednesday of school weeks. We have already met for 6 times till now: 13.12.2022, 11.01.2023, 18.01.2023, 25.01.2023, 01.02.2023, 08.02.2023, and both tournaments reached the quarterfinal stage.

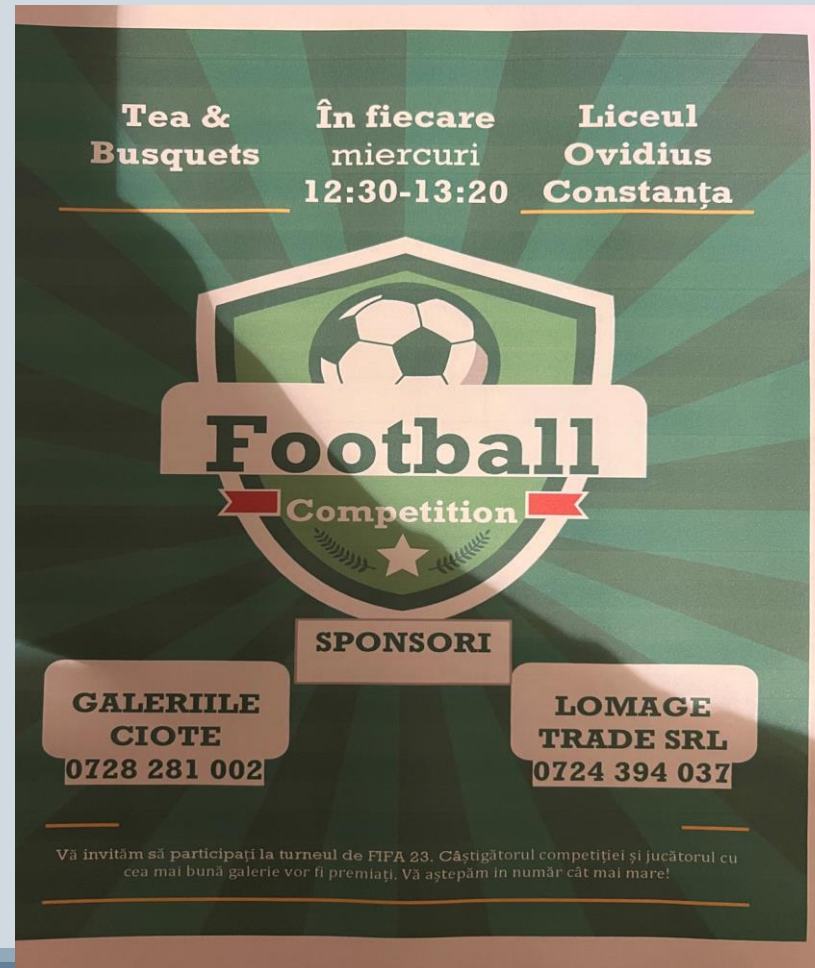

Each time an attendance list was drawn up, with the signatures of those who came at the weekly meeting of the club, with an average of 12 students present. The number of those present fluctuated with the elimination from the competition, some of the competitors becoming feverish supporters.

ACTIVITIES – beneficiaries

- An average of 12 participants per meeting took part in our activities.
- Our project reached 22 participants in presence, but summing them with the supporters of the teams, we can say that the beneficiaries are more than that. The project is not only about participants, but also about the audience made up of the fans.

Testimony are the pictures, videos and Presence lists attached in the following slides.

Playing into the Future...

- *Taking into account the upward trend that ESPORTS have at World level, the Club can be a constant presence in the life of Ovidists, it can develop by generating tournaments not only of football, but also of any other "electronic sport" with the possibility that, the best teams or individuals to compete with teams from other high schools in the country and abroad.*
- *Shortly after the start of the of the tournaments, we managed to find the support of two hearty sponsors, so that the prizes awarded to the winners of the tournaments and the most ardent gallery will not be only symbolic.*
